

**REMARKS/ARGUMENTS**

In the Restriction Requirement mailed 06/22/2007, the Examiner indicated this application contains claims directed patentably distinct inventions, specifically:

- Group I. Claims 1-15, drawn to a method for calibrating a color image output device, classified in class 358, subclass 504;
- Group II. Claims 16-22, drawn on an image output device, classified in class 358, subclass 1.9; and
- Group III. Claims 23-46, drawn on a method and apparatus that adjusts an image output engine based on an adjusted parameter, classified in class 358, subclass 518.

Applicant is electing Group III, Claims 23-46. The claims to the other Groups have been cancelled without prejudice and disclaimer. In view of the examiner's earlier restriction requirement, applicant retains the right to present claims 1-15 and 16-22 in one or more divisional applications. As a result of this response, claims 23-47 are now pending. The applicant notes that claim 47, as originally filed, was not designated into any of Groups I-III; however as claim 47 depends from an independent claim of Group III, applicant respectfully includes claim 47 as an elected claim.

If there are any fees necessitated by the foregoing communication, please charge such fees to our Deposit Account No. 50-0902, referencing our Docket No. 66329/24815.

Respectfully submitted,
